Hello, I'm
Esha Sai Maddela

I am a B.Tech Computer Science and Engineering Specialisation in Artificial Intelligence & Machine Learning student at VIT-AP University. My technical interests include AI, ML, Full Stack Development and Data Science.

Andhra Pradesh, India eshasai709@gmail.com +91 9398239578

7.70 B.Tech CGPA (VIT-AP)	80+ GitHub Repositories	200+ GitHub Contributions	400+ Coding Problems Solved

About Me

Profile summary, education history, and technical skill sets.

I am a B.Tech Computer Science and Engineering Specialisation in Artificial Intelligence & Machine Learning student at VIT-AP University. My technical interests include AI, ML, Full Stack Development and Data Science.

Languages: English Hindi Telugu

Academic Journey

Education

VIT-AP University
Sep 2023 – Sep 2027

B.Tech CSE with Specialisation in AI and ML

CGPA: 7.70

Narayana Junior College
June 2021 – April 2023

Intermediate (MPC)

Percentage: 98.7%

Narayana Concept School
June 2020 – April 2021

10th Class

Percentage: 98.3%

Skills & Technologies

Detailed categorization of AI/ML technologies, full stack development, data science, cloud platforms, and tools.

AI & Machine Learning
Artificial Intelligence, Machine Learning, Deep Learning, NLP, LLMs, Reinforcement Learning, Generative AI, Agentic AI, Explainable AI (XAI), PyTorch, Scikit-learn

Full Stack Development
Python, Java, C, C++, JavaScript, HTML, CSS, React.js, Next.js, Node.js, Express.js, Streamlit, Tailwind CSS, Bootstrap, MERN Stack, SQL, MongoDB

Data Science & Data Engineering
Data Science, Data Analysis, Data Engineering, Data Visualization, Statistical Analysis, Exploratory Data Analysis, Pandas, NumPy, Power BI

Cloud & Tools
AWS, Google Cloud, IBM Cloud, Git, GitHub

Work Experience

Open source contributions, virtual internships, and job simulations.

Forage – Virtual Internships and Job Simulations
Jun 2026 – Jul 2026

Virtual Intern

- Completed BCG Data Science, Tata GenAI-Powered Data Analytics, and Forage Project Management virtual job simulations.
- Gained practical exposure to data analysis, Generative AI, exploratory data analysis, data visualization, business problem-solving, and project management.

GirlScript Summer of Code (GSSoC)
Sep 2025 – Nov 2025

Open Source Contributor

- Explored different open source projects in Web Development, AI, ML, Git and GitHub.
- Improved skills in Web Development, AI, ML, Git and GitHub.

Adroit Technologies Innovative Solutions Pvt Ltd
Jun 2025 – Jul 2025

Generative AI Intern

- Completed internship training in Generative AI using IBM Cloud, gaining practical exposure to AI technologies.

- Developed foundational skills in Python, Artificial Intelligence, Generative AI, and Natural Language Processing (NLP).

Forage — Aug 2024 – Aug 2025

Virtual Internships & Job Simulations

- Completed industry-aligned virtual simulations from top global firms including **Deloitte, BCG, Accenture, PwC, Wells Fargo, Citi, HP, and Commonwealth Bank**. Developed practical skills in Software Development, Data Analysis, and AI solutions.
- Solved real-world problem statements with data preprocessing, exploratory data analysis, and solution architecture design. Gained insights into enterprise workflows, consulting practices, and technical implementations.

Featured Projects

Key projects across AI, Machine Learning, Deep Learning, NLP, Reinforcement Learning, and Full-Stack Web Development.

< >

Weather Web App using React

Developed a responsive weather application using React.js to display real-time weather information for searched locations. Integrated the OpenWeather API to fetch and display temperature, humidity, wind speed, and weather conditions. Implemented dynamic search functionality with error handling and a clean, user-friendly interface.

React.js · OpenWeather API · JavaScript · CSS3 · Dynamic Search

GitHub Repository

Reinforcement Learning Stock Trading System

AI-driven stock trading system using Reinforcement Learning algorithms such as Deep Q-Networks (DQN) and Proximal Policy Optimization (PPO) for automated buy, sell, and hold decisions. Trained RL agents on historical stock market data to optimize trading strategies and evaluated return, profit, and risk analysis metrics.

Reinforcement Learning · DQN & PPO · Python · PyTorch · Stock Analytics

GitHub Repository

Course Recommendation & Learning Analytics Bot

AI-powered course recommendation and learning analytics bot using NLP, LLMs, Transformers, and Machine Learning. Built personalized recommendation pipelines and learner profiling systems for skill-based course suggestions. Implemented automated summarization and conversational assistance using LangChain and Generative AI models.

NLP · LLMs · LangChain · Generative AI · Transformers

GitHub Repository

AI Multimodal Customer Churn & Sentiment Analysis

AI-powered customer behavior intelligence system using ML, Deep Learning, NLP, and Transformer models. Features end-to-end pipelines with Pandas, Scikit-learn, EvoBoost, and SHAP for explainable AI. Integrated PyTorch, Hugging Face Transformers, LangGraph, and Streamlit.

PyTorch · Transformers · SHAP / XAI · Streamlit
